

# Bootstrap Typography

---

## Basic Typography

**Headings:** Bootstrap provides default styles for all HTML headings (<h1> to <h6>). You can also use .h1 to .h6 classes for heading styles without using the actual heading tags.

**Body Text:** The base font size is 1rem (16px), and the line height is 1.5. Use the <p> tag for paragraphs.

## Display Headings

Use .display-1 to .display-6 for larger, more prominent headings.

```
<h1 class="display-1">Display 1</h1>
```

```
<h1 class="display-2">Display 2</h1>
```

## Lead Paragraph

Make a paragraph stand out by adding the .lead class.

```
<p class="lead">This is a lead paragraph.</p>
```

## Inline Text Elements

**Marking Text:** Highlight text with the <mark> tag.

**Deleted Text:** Use <del> to indicate deleted text.

**Inserted Text:** Use <ins> to indicate inserted text.

**Underlined Text:** Use <u> to underline text.

**Small Text:** Use the <small> tag for fine print.

```
<p>You can use <mark>highlighted text</mark> for emphasis.</p>
```

```
<p><del>This text is deleted.</del></p>
```

```
<p><ins>This text is inserted.</ins></p>
```

```
<p><u>This text is underlined.</u></p>
```

```
<p><small>This is fine print.</small></p>
```

## Text Utilities

**Text Alignment:** Use .text-left, .text-center, and .text-right to align text.

**Text Transformation:** Use .text-lowercase, .text-uppercase, and .text-capitalize for text transformation.

**Font Weight and Italics:** Use .font-weight-bold, .font-weight-normal, and .font-italic to adjust font weight and style.

```
<p class="text-center">Centered text</p>
<p class="text-uppercase">Uppercase text</p>
<p class="font-weight-bold">Bold text</p>
<p class="font-italic">Italic text</p>
```

## Lists

Unstyled List: Remove default list styles with .list-unstyled.

Inline List: Display list items inline with .list-inline.

```
<ul class="list-unstyled">
  <li>Item 1</li>
  <li>Item 2</li>
  <li>Item 3</li>
</ul>
```

```
<ul class="list-inline">
  <li class="list-inline-item">Item 1</li>
  <li class="list-inline-item">Item 2</li>
  <li class="list-inline-item">Item 3</li>
</ul>
```

## Blockquotes

Basic Blockquote: Use the <blockquote> tag for quotations.

Blockquote with Footer: Add the source of the quote with the <footer> tag.

```
<blockquote class="blockquote">
  <p class="mb-0">This is a simple blockquote.</p>
</blockquote>
```

```
<blockquote class="blockquote">
  <p class="mb-0">This is a blockquote with a footer.</p>
  <footer class="blockquote-footer">Someone famous in <cite title="Source Title">Source
  Title</cite></footer>
</blockquote>
```

## Responsive Font Sizes

Bootstrap adjusts the font sizes responsively based on the viewport size.
